

Mushy's Bakery

As a business, it is important to have a digital presence in order to increase the amount of exposure to have more customers and keep a business running. This web application allows for a user to view baked goods in Mushy's bakery (as well as locations and contact). When a user is introduced to the page, they will be able to only see the baked goods and locations. If a worker is signed in, they will be able to modify things such as goods and customers orders. This application was created for the sake of a specific bakery that needed help with organizing. Previously, Mushy's bakery only used paper to write down all goods and customer's orders, but with the application, it is easier for workers to enter items and keep track of things with the databases.
